What Sets Sloane Apart

Sloane Helicopters – the name renowned for an extensive range of industry-leading, tailor-made aviation products and services.

We are the UK's leading supplier of helicopter sales and services with the emphasis on unparalleled quality and exceptional Customer care.

Our dedicated network of different service providers offer distribution, a service centre, an acclaimed flying school, ground transportation, helicopter transfer and fixed-wing services. In addition, we offer a world-class service in the fields of maintenance, design, modification, installation, customised avionics, training and operations. We also proudly operate client and company-owned aircraft in our busy and diverse Flight Operations Department.

In short, Sloane supply a single, seamless solution to all aviation travel requirements.

Sloane has for almost 40 years remained in the same private ownership of its Chairman, David George. Over those years, we have built an enviable reputation, life-long relationships with Customers, and are proud to be the preferred choice of the VIP and Corporate market, as well as a leading supplier to the Ministry of Defence, Police Air Units and Air Ambulance Operations.

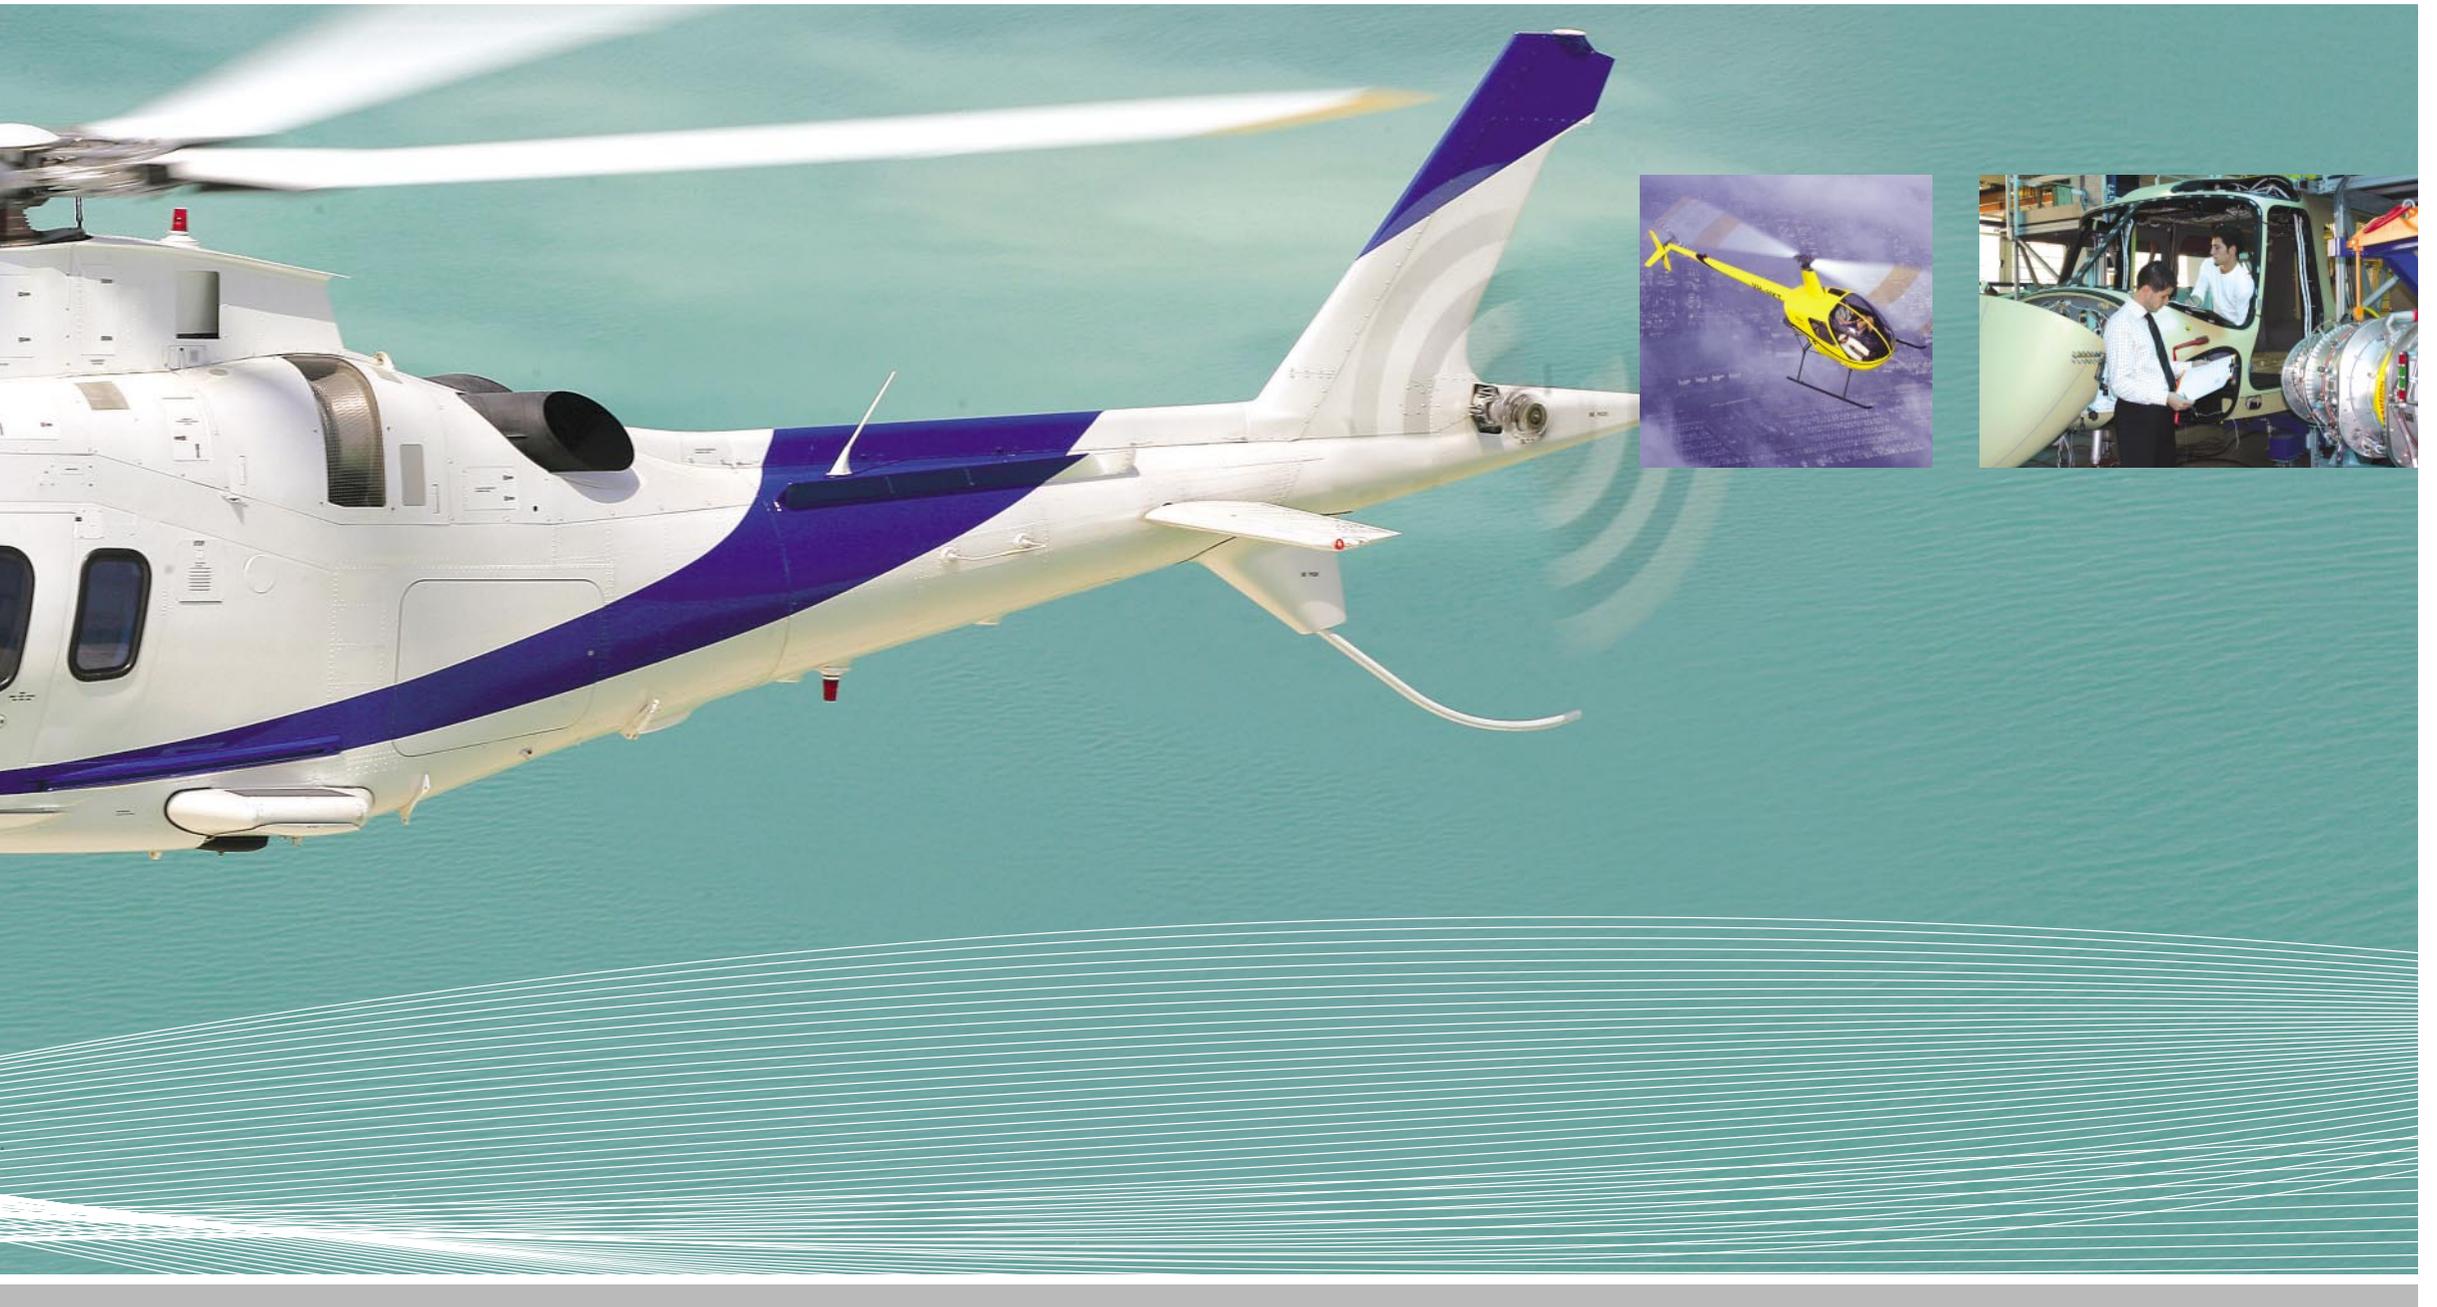

Our lasting and ongoing commitment to leading the way in innovation, technology, safety and reliability is what makes Sloane Helicopters so different. It is what sets us apart in the world of Aviation.

The Sloane way of doing things – exceptional technology applied to the everyday needs of aviation transport.

SLOANE

Leading the way in so many ways

However you want to take to the skies, Sloane Helicopters can take you there in style.

We have the facilities and the abilities to be your one-stop solution to all aspects of executive and personal transport. From sourcing the aircraft, to operating it; from maintenance services, to the installation of complex avionics and mission systems, right through to providing the most prestigious and luxurious interiors available on the market. Whatever you request, we can manage the whole process for you.

Whether your aim is to fly a personal two-seater, or sourcing a 17-passenger Public Transport helicopter, Sloane have the resources to meet your requirements with peerless standards of technology and efficiency.

Meeting the most complex specification and delivering the demanding performances required by Police Air Support Units, Air Ambulance Operations and Armed Forces are all within the reach of our diversified skills, from the integrated Project Management approach through to our committed dedication to the achievement of the Mission.

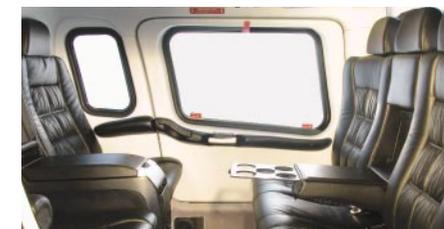

At Sloane, we take great pride in our 'Centre of Excellence' status in supporting Agusta, Robinson and Bell helicopters. Supporting over 90 aircraft, the Sloane Hangar Services are renowned for the speed by which high quality inspection and repair work is completed.

The convenient locations in England and Ireland of our Sales Offices and Maintenance Facilities make Sloane an excellent short-term or permanent base for Customers' aircraft.

Our Flight Operations Department co-ordinates a flexible aircraft management programme. The arrangements, tailored to meet each client's requirements, are a very popular means of reducing the costs of private helicopter ownership.

The unbeatable reputation we have built over the years is down to our determination to deliver a service that is always second to none.

Our main asset at Sloane is our people and their skills dedicated to safety, sustained effectiveness and the efficiency of resources.

SLOANE

Our reliability sells itself

There are as many reasons to own a helicopter as there are owners.

These reasons include saving time, avoiding congested roads, reducing the stress of air travel, and improving personal security.

Not to mention the sheer fun of flying in a helicopter.

Whether you wish to own and fly your own craft, or fly as a Very Important Passenger, Sloane can tailor-make an airborne solution to suit you down to the ground.

Perhaps a nippy two-seater is what you require to get you away from the crowded roads? Sloane can offer you the freedom of transport about which the average traveller can only dream.

If it is power, performance and capability you require for rapid transportation of key executives, or the speed and reliability of an Air Ambulance or Police helicopter, Sloane can provide a state-of-the-art helicopter that will take your breath away.

Whatever your requirements - saving time or saving lives; minimising management, or maximising efficiency - our dedicated Sales Team can advise you on all possible options of aircraft, and all aspects of helicopter flight, to fully match your particular needs. This personal service even extends to the opportunity to custom-finish your helicopter to be as individual as your particular desires - the ultimate statement of individuality in state-of-the-art technology.

Emergency services, government bodies, and informed individuals choose Sloane for sales and support, based on our considerable experience as Distributors for Robinson and Agusta for the UK and Ireland.

They all rely on Sloane to keep them in the air. You can too.

Your own helicopter is the ultimate way to get the most out of your time, enabling you to get anywhere, any time, all the time.

Designs on excellence

Design

To listen and to understand are the first priorities of our Design and Modification Team when meeting our Customers.

From the simplest off-the-shelf upgrade to the most complex one-off installation of experimental equipment, it is through active listening that we achieve a clear and complete understanding of the Customer's specific and individual requirements.

The Team will then create a conceptual design for you to evaluate and discuss further. This is how at Sloane we ensure the finished design exactly matches our Customer's wishes. This is how we lead the way in the industry.

Maintenance

A helicopter is a complex, intricate and sensitive piece of technology. It requires a particularly high standard of maintenance engineering. The kind of engineering you find at Sloane.

Based in the custom-built hangar complexes at Sywell and Enniskillen Airports, our Maintenance Department always has the very latest tools, spares and the specialist support on hand to get the job done quickly, efficiently, cost-effectively and without compromise to the needs of safety.

The Department is structured and equipped to meet the exacting and demanding standards of total engineering that both corporate and private clients demand.

Component Overhaul

Sloane Helicopters has a designated Overhaul Team with highly skilled engineers to provide specialist repair and overhaul services for a broad range of mechanical components.

The services of Sloane Overhaul are available either independently or as part of a comprehensive maintenance support package.

The highly skilled and dedicated workforce work closely with the Original Equipment Manufacturers (OEMs), obtaining quick and practical technical support which translates into optimum levels of cost-effectiveness for the Customer.

Avionics

The intricacy and sophistication of modern day avionic equipment advance with bewildering speed. That is why our Customers come to rely on Sloane's extensive team of Avionics Licensed Engineers. These experts have an unrivalled level of knowledge and expertise at handling both modern complex systems and the full range of standard instruments and radios.

Because at Sloane Helicopters, we have the advantage of a "loan pool" of avionic equipment, we can not only identify the source of the problem, but in many cases immediately resolve the issue while any defective item is sent for repair.

Your avionics – and therefore your protection – are in safe hands with Sloane.

SLOANE

The sky's the limit

Flying in a helicopter is a unique experience, quite unlike any other way to travel. Be warned – whether for business or pleasure, this remarkable form of transport can become addictive.

Charter

The Sloane Charter Team provides totally reliable travel solutions for a wide range of flying requirements. Whether it is getting you to a meeting in Paris in 90 minutes, or getting a bride to the church on time (and in style); whether it is luxury travel to a sporting event, or life-saving Air Ambulance support, our Team pride themselves on a 'can do, will do' attitude.

We have the resources to match Customer requirements with the right choice of aircraft, every time. Sloane's pilots are carefully selected to ensure total professionalism both on the ground and in the air. Aircrew are trained to provide as much or as little help and advice as may be appropriate at any one time.

Extraordinary events are everyday areas of specialisation for the Sloane Charter Team.

Training

If you want to be in control of one of these magnificent flying machines, then the Sloane Flying School, based at Sywell Airport in Central England, is where your adventure begins.

We offer a wide range of courses, from beginner and refresher courses, right up to professional qualifications. Our team of experienced Instructors is available seven days a week, so training can fit in around your schedule. Training can be done on an ad hoc basis or on a full-time residential course. We also have a Flying School in Mallorca where some, or all, of the training can be taken.

We have a thriving professional and rigorous yet "Club" approach to enjoying this exhilarating pastime, with a range of events scheduled throughout the year, such as Mountain Flying, Group Flying Events and Helicopter skills competitions.

Whether you want to take to the air from the cockpit, or from a well-appointed passenger seat, Sloane Training & Charter can help put you in control.
